

Miracle.

### Playground Thriller: The GIGANTA Attraction

A triple-decker climber with two tunnel slides and a monster-like appearance makes the Giganta a child pleaser on any playground. Safe, durable and exciting, the Giganta handles heavy playground traffic with its twin slides while providing thrills and body-building exercise at the same time with its ladder climbers. At 22½ feet high, 21½ feet long and 9½ feet wide, it dominates most playgrounds by its mere size. Refer to Giganta 111-745 in your inquiry.

Since 1927, Miracle has empowered children to explore, innovate, and pioneer new possibilities through play. Now, we celebrate this legacy as we make way for the leaders of tomorrow.

Take a peek at our nearly century-long heritage at [Miracle-Recreation.com/History](https://Miracle-Recreation.com/History)

Miracle exists to foster active and healthy lifestyles through play experiences that encourage thrilling exploration, helping children develop the character to lead tomorrow.

A lifetime of self-discovery, independence, and leadership begins on a playground—where children take perceived risks that challenge, transform, and invite them to see new perspectives.

At Miracle, we believe kids want action!

# Thrilling and challenging play

experiences test individual limits, teaching children coping skills while also building resilience.

We believe freedom of exploration allows for

# **self-discovery,**

creating more independent individuals that  
are confident in their choices.

Every Miracle play space is built with

# innovation

from the ground up. From the smallest details like clamps and coatings to the next big idea in play concepts, our dedication to innovation is the secret to creating playgrounds that last.

A young girl with brown hair tied back, wearing a pink hoodie and grey pants, is sitting in a wheelchair on a colorful playground structure. She is laughing joyfully, looking towards the left. The playground structure has blue and green components. In the background, there is a brick building with arched windows under a clear blue sky. The wheelchair has a black seat and large, treaded tires. A small logo on the wheelchair reads "COMFORT ACTA-EMBRACE".

We believe the thrill and challenge  
of a Miracle playground should be

**inclusive,**

because an individual's journey of self-  
discovery should have no limitations.

A child is seen from the side, sitting on a swing. The child's hand is visible, gripping the metal chain of the swing. The background is a dense forest of green trees, with sunlight filtering through the leaves, creating a bokeh effect of bright, out-of-focus circles. The overall mood is peaceful and natural.

We believe in our

# **community**

of family businesses and local neighborhoods, who understand that investing in play is investing in their children, who will be the leaders of tomorrow.

# Miracle representatives make creating playgrounds a family tradition.

One of the reasons why Miracle playgrounds are in touch with what communities need is because many of our representatives come from families who have worked with Miracle in the playground industry for decades. With representatives located all over the world, it means we are by your side to build a strong and happy community through play!
