

Outdoor Musical Instruments For
Landscape Architects

PercussionPlay
Outdoor Musical Instruments

Music Made for the Great Outdoors

Percussion Play is the world's leading manufacturer of outdoor musical instruments. Designed with durability in mind, we are committed to making musical expression accessible to everyone, everywhere.

Sound Landscaping

Percussion Play has the industry's most comprehensive portfolio of outdoor musical instruments to choose from. Combining sculpture with music, our instruments ideal for schools, local, Parks & Rec teams, local authorities, family attractions, house builders and landscape architects looking for dynamic, inclusive playful items which add energy and soul to countless outdoor spaces. Integrated with local architecture or landscaping they cross the boundaries of usual play equipment and can be appreciated by all persons irrespective of their age, or ability.

Constructed of resilient, easily cared-for materials, these instruments can withstand the worst effects of the elements, in all sorts of environments, with no detriment to their sound or tuning. Each instrument is designed to avoid costly or long-term maintenance. Where possible we've designed the instruments to be played simply by using your hands, but where beaters are required, we've engineered them as one complete piece and attach using coated stainless-steel cables.

Most instruments are made from stainless steel or aluminium with high corrosion resistance, making them stand out in terms of durability, performance and appearance.

The outdoor musical instruments create a durable way for kids to engage in creative play. We wanted instruments that were easy to install, sounded beautiful, and were accessible to kids of different ages.

Therapeutic Landscapes

Music is like physical exercise: it's for all ages and for all people. And like physical exercise, participation in music leads to good health and wellbeing. Music making is fun and uses different skills to the ones that most people usually employ on a day to day basis making it relaxing and can relieve feelings of stress and anxiety.

Outdoor musical instruments are an innovative and delightful way for children and adults to enjoy the outdoors and because they are fully inclusive, accessible and multi-generational, they make music-making possible for all ages and abilities. Grandparents can play alongside their grandchildren (or even great-grandchildren!) and children with disabilities - who are often left to sit and watch their able-bodied friends and siblings have fun - can now play side-by-side in a sensory-rich playground environment.

Everyone and anyone can make music and playing musical instruments can help bring communities together across generations, cultures, social classes, income brackets and ability in a way that no other medium can.

Music is able to bring a diverse group of people together in the community because it transcends language limitations- instead providing its own language of rhythm and melody to enable its players and users to communicate with each other non-verbally. Providing opportunities for members of a community to be around each other in this way promotes familiarity and the formation of healthy relationships and helps to engender a sense of belonging for those who participate. It is apparent then that music can help us to develop a more harmonious society if access to it is provided and engagement promoted.

Music Matters

When searching for inspiration and the right instruments, you can browse through our website to find and download all the necessary files and technical documentation, enabling you to create your unique solution for the play and activity space. Alternatively, to incorporate our products into your plans quickly, our CAD & 3D drawings, product specifications, media files and more are now available for free download at CADdetails.com. This is an online source for manufacturer-specific building product information for input into working plans and specification documents. CADDetails.COM

We have supplied our instruments to projects in school playgrounds, parks, activity trails, family attractions, museums, hospitals, elder centers, seaside piers, zoos and even a cruise ship. No musical knowledge or skill is required in order to create beautiful sounds and all our instruments are orchestrated to be pleasing to the ear for the players and those listening nearby.
